Adidas F50 last hurrah.

## adidas F50 football boots.

Adidas the legendary football boots maker iconic for the three stripes that can be seen in all their boots. F50 is one of their boots started production in 2004 marking fifty years since 'jerry' wins the European Championship.

Attribute as the most lightweight football boots silo built by Adidas, the year 2015 marking the ends as Adidas decide to discontinued the boot silo to replace it with another brand new football boots silo called Adidas X, "X" means chaotic that is.

Football 2D : Z. Ibrahimovic

Zlatan Ibrahimovic / paris saint germain. 2015. by abe

## Football 2D : Zlatan Ibrahimovic.

Zlatan Ibrahimovic, the last of his breed, a complete forward, the best on its game. He can deal with defender all right, used to be run fast, great acrobatic skills, opportunistic attitude. Had been played for some of the greatest teams in Europe, currently under contract with France's Paris Saint-Germain. It is my rendering of PSG's Zlatan Ibrahimovic wearing the 2016 PSG kit.

Fiat 500 Mark 1 Original.

## Fiat 500 Mark 1.

The famous Fiat 500 or 'cinquecento' in Italy is the brilliant answer to the concept of car for the common people in 1960. its small, its cheap, its fuel efficient plus its looking good as well, hell its still looking good even today.

But this particular beauty is even more awesome, gone are those awful lagging fiat engine, in with the new Porsche's own air-cooled infamous flat-six engine. Sporting a wide-body kit means requires wider tire thread and thats when this Rotiform CCV with Toyo Proxes R888 comes in.

And who need rooftop when you life in southern Italy or SoCal for that matter so we chopped the top and makes it convertible of course.

Scion FT-86 Rocket Funny.

 **Rocket Funny**

ads X

## FT-86 Rocket Funny.

FT-86 a joint venture in-between Toyota Motors and Subaru shares the identical chassis to the Subaru's own BRZ what sets them apart is the engine in which two manufacturer developed themselves.

This model pay homage to the Toyota 80's popular AE-86 or Toyota Sprinter Trueno for you reader. Lightweight chassis, Front-middle placement Flat-Four Engine, Two-Door and four seater combo makes it a hit among young automotive enthusiast and its not that expensive either so its sell like a hot cakes.

Rauh Welt Begriff : Porsche 993.

**RAUH-Welt**  
B E G R I F F

## Rauh Welt Begriff : Porsche 993.

Rauh-Welt-Begriff (RWB) or in english we called it simply 'Rough World' is a brand of wide-body kit that specialized in classic air-cooled Porsche. Supposedly if you got the money to buy that Porsche in the first place, why not install this cool wide-body kit by irreversibly damaging the car by cut off the fender then jammed four offset wheels.

Nakai-San is the man behind all this movement started with his fascination with Porsche wanted to make a perfect track-day Porsche for everybody who shares the same passion of motorracing with Air-cooled Porsche that is.

That purple Porsche is His its called Rotana.

TopGear UK Tribute.

A  
Tribute  
to  
an  
ambitious  
motoring  
show  
so-called

A Tribute to an ambitious motoring show so-called TopGear UK.

The show aired for twenty-two seasons and broadcast over hundreds of countries.

TopGear UK is presented by three very contradictory presenters against each other.

But the chemistry between those three presenters is irreplaceable though.

Apart from just a television show, TopGear also makes a car critics magazine bearing the same name.

Somehow all three presenters agree and (really) like the rather charismatic and now defunct car manufacturer called Lancia.

Capitol J.

## Capitol "J".

Capitol J, the word 'J' refer to there is no other way of saying this, its Jakarta.

This particular images is the cover images of the Highly anticipated illustration books called "The Twenty-Two Jakarta's Most Dangerous Drivers".

The images says it all, it depict the Capitol city of Indonesia, Jakarta (fyi) quite literally.

Like all third-world-nation, it has very poorly-made asphalt road and awful public transports, way too many Human Being (not that it was a problem) and entry-level-car on that matter.

The result you can see for yourself.
