CURRICULUM VITAE

Hello!

My Name is Ricky, but they usually call me Kim-phoy hahaha (if you know what I mean). I was born in Surabaya, April, 21th 1993. in Kartini's power days. I'm a fun person. I foresee every-problem from many angles and various views, but you can judge me yourself.

For me, I'd like to picture my life as a racing car. A car that could win the the rate or it could go dangerous path and crash. It all depends how the driver steers the wheel. It could turn into something good, something awesome and sometimes things go bad.

So would you be my co-driver to lead me into the right path and finish my finish line and gain new experience?
