PERSONAL STATEMENT

I graduated from Indonesia Computer University in 2015 through Visual Communications Design degree. I'm having a strong passion in graphic design and illustration, either in detailed realism illustration or minimalism flat design illustration. I also love experimenting, exploring, and trying over various kind of illustration style, refine and mix them into a fresh adaptable illustration.

I always do some researches before starting any design processes. I believe that design without research is nothing but a soulless two-bit decoration. In layout, I often make a clean design composition, giving a high contrast between foreground and background, wishing to deliver the design message without any noises.
