### Indie Short Movie - 2011

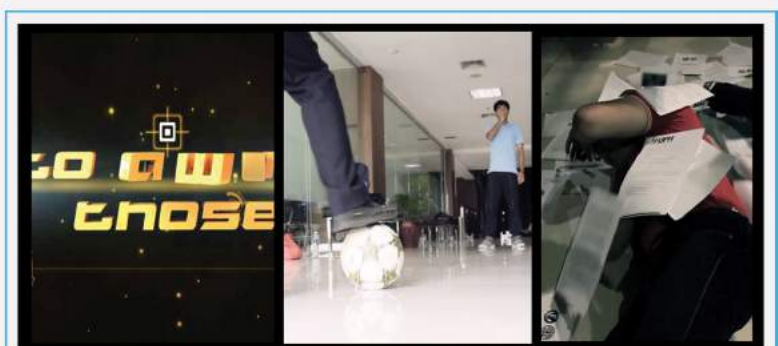

First time approach VFX industry, me and my friends try to create hollywood movie effects using my imagination and creativity. From story boarding, cameraman, director, compositor, VFX, rendering & publishing all done by my self. My friends helps me become actor in several short movie. Some of this short movie concept from video games and movies.

# 02

### Falcon Project - 2012

UPH Computer Technology division held a big events each year. This time I have the opportunity to help my faculty to visualize what sort of events will held. Some of the concept is about a student that running along the hallway with rush a bit to operate a robot that related to technology and the other video concept using motion graphics and tells when the event will start.

# 03

### UPH Eagle Activity- 2013

a college student organization which control UPH sports event. Using youtube publication it needs a great video representation that tell all about sport competition that will be held in UPH. With a free will concept, I'm using some funny things and also some serious approach to the audience. The results is quite satisfying & all by myself direct the actor, rough cut, VFX editing, finalazing & rendering.

### IPEKA Opening Title - 2014

as IPEKA School become more popular, it is important to stay focus on social media. So it needs a brand trade mark in opening logo. The opening logo use an ornament from teachers tie pattern. This concept tell us about that many teacher are involved to create a better future for children and to IPEKA itself.
