I remember the details I drew the torn clothes from the comic "Dragon Ball", and "Naruto". than after a long time when I was 19th years old, I made a picture of my face in a cartoon. Very interesting experiance and after that I always make vector cartons and do illustrator, and learn about graphic design from youtube and reading article or Book. until now,

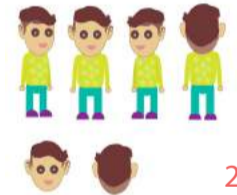

and I hope we can collaborate with each other as possible as clients and designers or maybe as graphic design artists.
