About Me

For years, I learnt about design either graphic or architectural to fulfill my curiosity and broad my skills. Learning design is not only at my formal education, yet actually my work environment give me more skills to understanding what design is.

I try to challenge myself to submit my design on any graphic design contest this year, like logo and infographic, and the result was great. It takes me to learn further and undertake new challenges. Furthermore, I am adept at handling multiple tasks on a daily basis competently and at working well under pressure.

Computing Skills
