## NUGRAHENI PUJI ASTUTI

Being obsessed with artistic creation & design

My name is Puji. I am a Graphic Designer. I do really love designing because I can play with colors; combining one color to another, make a nice composition on the page, and so on, it was so much fun! I also love to learn a brand new design trend and combine it with my own style, so I can keep up to date with and also have a characteristic of mine at the same time.

Isn't just designing, another passion of mine is write a content. especially when it comes to blogging or marketing. I usually merge designing, writing, and marketing sense of mine at once. As we've might known, only do designing isn't enough.

Ain't easy for me to get done with the only one formula. I am a fast learner. I try so hard to give my best in so many ways. I am straight forward & transparent. I want nothing more than a place in which I can fully contribute my whole skills and sharpen them at the same time; I want to be better as the company grows.
