

Fivust R. Agriwastora S.Des

Also known as F21ST

Illustrator | Graffiti Artist | Designer | Toy Maker

Fivust, also known as F21ST is an illustrator, graffiti artist as well as designer based in Bogor, Indonesia. Having been exposed to both art as well as design during lectures, and graduate as Bachelor of Visual Communication Design

His interest in graffiti begins when he is tired of struggling with paper and painting tools in general. He never stopped drawing from the first time using spray paint, and started found his rhythm. Graffiti makes him to have more perspectives and targets. His inspiration came from many things, such as daily life, pop culture, movies, clothing, food, architecture, and traveling. Everything gives him new ideas and new learning how to see it.

At the beginning he started making graffiti with characters, so his work is easier to convey messages. He began to make his character on the street in 2012. The first character he created is an alien, the character itself is always evolving, ranging from form and style. So his work can be identified from his distinctive style.

F21ST assumes that the styles and ideas presented in illustrations, graffiti, or other works are the same. He tried to combine the elements he had learned in his works.
