

OLAF A GERRITS

ABOUT ME

WORK EXPERIENCE

My work experience as a graphic designer started in 2020 until now. Before registering as a freelancer, I originally created a logo for a custom T-shirt design to sell in my online store. It wasn't long before I was interested in creating company logos, vector logos, nfts, avatar cartoons, templates, business cards, letter logos, etc. All of that I learned self-taught through youtube and google. The apps I use to date are logo maker, canva, pixellab, infinite design and, autodesk sketchbook. The logo I created I sell on the microstock agency site. That's the information I can give you. Thank you very much

EDUCATION

In 1997 I graduated from elementary school. In 2000 I graduated from junior high school. In 2003 I graduated from high school. In 2004 until now I worked at my aunt's company and while working I was in the business world, especially graphic design.

SKILL

Logo Design

Nft Pixel Art

Cartoon Avatar
