Kab. Semarang, Central Java.

Hi, my name Fajar As'ari. I'm graduate from Computer Science, Soegijapranata Catholic University in 2016. Information Systems Department, concentration in Game Technology.

I decided to be an illustrator because I love drawing, and want to make it as my profession. My background as computer science makes me know basic programming but still i'm not an expert on it.

PORTFOLIO

This portfolio contains digital Illustration, created using Madibang Paint Pro

In digital drawing, I already used pen tablet to draw, between cartoon or anime style, I'm still trying to learn both of that styles.
